bar, Willow, NATIVE SPRINGBERRY,

Myrtles, Pines, Firs, etc., etc. Also, the

very best Sugar House Ward, near the

Paper Mill.

## WATER.

Judge Snow Pursues the Subject Relentlessly.

SALT LAKE CITY, April 9, 1880.

Editors Herald:

I am in my office again, trying to solve the unsolvable water puzzle. I see the keepers of our consciences have given us encouragement to proceed with the water question. It is a good thing for me to have some of the wisest men of the city keep my conscience, as without restraint from others I might get lost from me and run wild. They have said the canal from Jordan to Salt Lake City is a laudable object, and that they were in favor of supporting the action of the Legislature and of the City Council. Very well, so am I. But I suppose they meant if the Folly family furnished the requisite supply. Well, the Folly family have voted the supply. What more!

I refer to this for the reason that when this public notice was given the vote for the supplies had not been taken, and for the further reason that they made it public thereby giving the public a right to use it. I, taken with the Follys, and the City Council, before this was done and before the vote was taken, were to some extent tied down. Now they can act with the sanction of the Legislature and with the sanction of the inhabitants, both in and outside of the city limits. If their action benefits all, so much the better.

This leads me to the law and the testimony. As I proceed I may, in some cases, state the law and testimony in connection with each other. To the law, I have not authority. The vote of the people to raise money has been acted upon. All right, then. The act to provide for the right of way for the canal to supply the inhabitants with water does not confine the action of the Council to the county limits. They may go to Utah Lake; but in going to that reservoir they must—I repeat, they must—obey the mandates of nature. In so doing they will avail themselves of the River Jordan from the lake to the County of Salt Lake, about nine miles.

When I say they must obey the mandates of nature, I intend to be understood that natural laws command us all, whether we be legislators, city councilmen or individuals; until now I have not seen a legislator enact a law by which the waters in that lake could be efficiently appropriated to the general good of the inhabitants of this city being a part. I saw, as I think, do see it. I want to do it. I want the right of way secured to that point. It will then belong to the municipalities of the territorial government, and therefore not easily disturbed. I have before said enough about the survey of the lake to determine whether or not it would injure the inhabitants of Utah County to dam up the lake, and if so, how much. It certainly cannot injure them to draw off the water. On the contrary, it may benefit them. Some say it can be dammed up without injury to others; it will injure them. I am not mistaken in the energy and disposition of the Folly family. They want to do good to each other without regard to residence, and to the quantity of water in the lake. Some say the lake is thirty miles long by twelve broad; some say twenty-four miles long by ten broad. The City Council evidently decided at about four-and-a-half miles long by ten broad. Taking the estimate of the Council, 137 square miles, and there is of surface feet 3,819,340,800; one foot drop makes that number of solid feet of water.

Hereafter I shall treat this number as 3,800,000,000, leaving out the balance. If we estimate the surface of the lake at 24x10 miles, it will increase this amount by 100 square miles and a little more, and if we estimate it at 30x12 miles it will make the surface 360 square miles. In this great there will be more than 10,000,000,000 surface feet of water.

After writing the above, a gentleman came into my office, who informed me that a surveyor and engineer gave to the City Council the estimate contained in the address: it is therefore only reasonable to suppose their estimate is nearer the facts, but this does not change the matter, so far as my object is concerned; my object being to show that in no case can we say yes, if the water in the lake can be drawn off, will there be a lack of water either for the inhabitants of the city or of the county outside of the city, and that these inhabitants of the city and of the county are, and will be, benefited thereby. But union is wanted. Engineering skill is very desirable. According to my recollection there was an act passed nearly twenty-five years ago, though it is not now before me, encouraging, not directly this measure, but a measure relating to slack water from the lake to or near the present dam. This showed the sense of the Foresights, and the foresight of the Folly family at that time; but then, as now, they did not quite see the water in the beginning. If some eight or ten years ago some of the Foresights and Foresights saw the benefits of securing this water and the land where the dam is built, and we, who are always in the land, see the Jordan; if so, can there be any reason why we should now neglect our opportunities? Had we not better step forward, not play the grab game, but grab the water. If the dam is right, say so. Let it say to the water, "stop here, if you come, but no farther; what the inhabitants now need of you may pass, but the balance must wait till your turn comes. It is fairly believed by many that by clearing out a channel at the lake enough water will flow at times to supply the necessities of the community. I think the above figures show it.

It is said by some that the dam is some fifty or more feet higher than the place where the city canal leaves the Jordan; if so, can there be any good reason why this fifty feet should be lost? Do we not need it to convey the water east and north at points where the water is designed to go for distribution?

I have before said if the water comes to the city, it will modify, perhaps revolutionize, the water system. Even if it revolutionizes, it may be better; revolutions usually improve. Let it be thought that I, by my silence, think the reservoir system in the cranks east and north of the city or the hydraulic system is impracticable, I wish to add that I have no doubt of the practicability of either. Engineering skill is sufficient for any or all of them. But one at a time is best. More years hence if needed, Yours truly, Z. Snow.

## TELEGRAPHIC

### FOREIGN

The Completion of the New British Ministry—Remarks has in Europe of Universal Peace.

London, 11.—The Observer has reason to believe that the Marquis of Salisbury will be created Duke. There is some talk of Mr. Goschen succeeding Lord Lytton as Viceroy of India. Among various suggestions made one has met with considerable favor in important quarters, viz., that Gladstone be called to the House of Lords and assume the premiership as the first lord of the treasury; that Lord Hartington be leader in the House of Commons and minister of war and Lord Granville be minister of foreign affairs.

Madrid, 11.—The cabinet council has decided that it would not be expedient to advise the King to commute the sentence of Otero.

Madrid, 11.—A railway collision occurred here on the 9th inst. Three persons killed and six injured.

London, 11.—A summons has been issued for a railway collision to be held on Wednesday. Gladstone has finally decided a public reception in London.

Cebu, 11.—Machado is expected here in a few days.

Paris, 11.—Republique Francaise, in an article, supposed to be written by M. Gambetta, denounces Jesuits, unauthorized religious congregations, Jesuits, Bonapartists and even the church itself as sworn foes of the republic.

London, 11.—A dispatch from Madrid says that King Alfonso has signed Otero's death warrant.

Paris, 11.—The Catholic Journals publish letters from bishops protesting against the decrees. The France says government counterproposal to convert former manifestations on the part of bishops, and that the minister of public worship will probably address a letter to the prelates reminding them of the provisions of the concordat, and declaring the firm resolution of government to cause the law to be repealed.

Berlin, 12.—The Post publishes the reply of Bismarck to a letter from Herr Ruelen for a congress to promote a general disarmament. Bismarck says: "I am so occupied with practical urgent business of the present that I am unable to devote the possibilities of the future, which I fear neither of us will see. Not until you succeed in winning over our neighbors to our plans could I, in behalf of ever defective faithfulness, undertake the responsibility of such proposals; but even then I fear a mutual control of nations over the armaments of their neighbors would be difficult and uncertain, and that it would be far from easy to create a form which could efficiently enforce the control."

Calcutta, 12.—The Viceroy will start for Simla on the 13th inst. It appears that he has placed his resignation in the hands of the secretary, but it is not prepared to retain office until the arrival of his successor.

Abouharman Khan is still at Kankun. It is expected that he will make a stand, the place chosen will probably be between Saltillo and Muke. Principal chiefs belonging to the opposition party at Guzman have arrived from Matamoros. Differences among the chiefs present a unanimous opinion. Theban's son and heir, only a year or two old, is the brother of the late king, have both died.

There is here a deep and general regret at the death of the Viceroy. It is expected that the Viceroy and Indians questions into party politics, and there is a general opinion that it will be a most dangerous decision if the Viceroy hands over the staff to be liable to recall, or be expected to resign, when the government which appointed him goes out.

Cabul, 12.—Logar, Wardak and Ziamut, chiefs, arrived on the 10th inst. The chiefs having quarreled, they had no program of their demands. They were for a recall of the ex-Ameer were refused at Durban. On Monday a brigade of 4,000 infantry and 600 cavalry, with ten guns, will march to co-operate with General Stewart, who will reach Guzman on the 20th inst, and will then take the route to Kandahar. Communications continue interrupted. Mahomed Jan has not yet arrived at Cabul, but promises to come shortly. Whether he comes or not is a matter of importance, as a great majority of his party have come in. He being an adherent of Mustafi, Habibulla Khan will probably follow him.

Paris, 12.—Clemenceau, republican member of the Chamber of Deputies, addressed his constituents on Sunday, amid great enthusiasm. He attacked the whole policy of government.

Washington, 12.—Postal changes on the Pacific. Established—Amargo, Los Angeles County, California; Dolores M. Vozar postmaster; Jackson, Plumas County, California; Fredrick Olsen postmaster; Moraville, Santa Cruz County, California; Benjamin F. Watkins postmaster; Valdivia, Fresno County, California; Gustavus Krogh postmaster; Sentinel, Fresno County, California; Calvin S. Payne postmaster; Elr, Whitman County, Washington; Wesley Walton postmaster; Centerville, Pima County, Arizona; John McBurnett postmaster; St. John, Apache County, Arizona; Sextus Johnson postmaster; Discontinued—West Union, Marion County, Oregon.

Name changed—Oreille, Yuma County, to Plomosa, and N. J. Coleman appointed postmaster. Postmasters appointed—Oscar C. Schurze, Germantown, Clus County, California; Romayna Williams, Pasadena, Los Angeles County, California; Wm. J. Swartz, Slide, Humboldt County, California; Richard Roscoe Oliver, Yuba County, Nevada; Wm. N. Cook, Marietta, Esmeralda County, Nevada; Casper Tucker, Thelma, Douglas County, Nevada; David Seville, Reno, Nevada; California; Charles H. Mann postmaster; Oriel, Whitman County, Washington; Wesley Walton postmaster; Centerville, Pima County, Arizona; John McBurnett postmaster; St. John, Apache County, Arizona; Sextus Johnson postmaster; Discontinued—West Union, Marion County, Oregon.

### Oleomargarine.

Chicago, 12.—A suit pending in the United States court of this city, concerning the oleomargarine patent, has been brought out the astounding fact that oleomargarine, which is never quoted in the market, and which is not kept by any merchant, as such, has a sale in this country of \$8,000,000 pounds per annum.

### Poverty and Suffering.

"I was dragged down with debt, poverty and suffering for years, caused by a sick family and large bills for doctoring, which did them no good. I was completely discouraged, until one year ago, by the advice of my pastor, I procured Hop Bitters and commenced their use, and in one month we were all well, and none of us have seen a sick day since, and I say to all poor men, you can keep your families well a year with Hop Bitters for less than one doctor's visit will cost. I know it."

A WORKMAN.

## INVALIDS AND OTHERS SEEKING

### HEALTH

STRENGTH AND ENERGY, WITHOUT THE USE OF DRUGS, ARE REQUESTED TO SEND FOR THE ELECTRIC REVIEW, AN ILLUSTRATED JOURNAL, WHICH IS PUBLISHED FOR FREE DISTRIBUTION.
